

Annual notifications

Annual gonorrhoea notifications among GBM

Scenarios

- Base Scenario (no gel uptake)
- (a) Uptake in all subpopulations up to 'lube threshold' (50%)
- (b) 50% of condom users downgrade and 50% of non-condom users upgrade
- (c) All condom users downgrade to gel
- (d) All PrEP users switch to gel
- (e) 50% of PrEP users and HIV+ GBM switch to gel
- (f) 50% of non-PrEP users switch to gel
